

Web Full Stack Developer

POSITION OVERVIEW

We are looking for a highly skilled and experienced web full stack developer to join our team. The ideal candidate will have a strong understanding of both front-end and back-end development, as well as experience with a variety of programming languages and technologies. The successful candidate will be responsible for designing, developing, and maintaining our company's web applications.

Duties and Responsibilities

- Design, develop, and maintain our company's web applications.
- Work with a team of engineers to create innovative and user-friendly web applications.
- Stay up-to-date on the latest trends in web development.
- Troubleshoot and debug web applications.
- Work with other departments to gather requirements and ensure that web applications meet the needs of the business.
- Document code and processes.
- Collaborate with other developers to improve the quality of web applications.

JOB REQUIREMENTS

- Bachelor's degree in Information technology or a related field.
- 3+ years of experience in web development.
- Experience with a variety of programming languages, including JavaScript, HTML, CSS, PHP, Python, Java, .NET
- Experience with a variety of web development frameworks, such as React, Angular, Django, AdonisJS and Laravel.
- Experience with database development and administration, such as MySQL, Oracle, PostgreSQL.
- Experience with version control systems, such as Git and GitHub.
- Strong problem-solving and debugging skills.
- Excellent communication and interpersonal skills.
- Ability to work independently and as part of a team.

BENEFITS

Competitive salary and benefits package.
Opportunity to work on challenging and rewarding projects.
Collaborative and supportive work environment.
Chance to make a real impact on the company and its customers.
